Experience It! Geothermal Greenhouses

Growing food in Iceland has historically been a challenge for residents due to the cold climate, unproductive land, and at times, a lack of natural light. Discover how modern technology defies these natural challenges with geothermal greenhouses. At a family-run greenhouse, learn how they are able to harness the natural warmth from the ground's geothermic waters and use it to create a year-round Mediterranean climate. Join a horticultural expert for an insider's look at innovative growing methods used to produce a large variety of tomatoes that are able thrive in this otherwise challenging environment.
